

ROTARY TILLER WITH AUTOMATIC SIDE SHIFTING

Get your seedbeds ready for planting and control weeds between rows with a automatic side shifting rotary tiller. They're built to handle the daily demands of gardeners, nursery owners, landscapers and small farm owners. The hydraulic system on the machine performs the operation of getting away from the plant body automatically with the help of the sensing rod with no need of intervention of the driver and it does not harm the body even if it is a sapling.

Model	Working Width	Working Depth	Width	Length	Height	Number of Flange	Number of Horizontal Blades	Weight	Required Power
	mm	mm	mm	mm	mm	pcs	pcs	kg	hp
