

MOUNTED FERTILIZER SPREADER SINGLE DISC

Fertilizer spreader is used before planting crops and after planting the crops. The purpose of the fertilizer spreader is to increase the efficiency of the soil and the crop. Stercoris TAV fertilizer spreader has a tank volume of 400 - 500 - 600 - 800 - 1000 Lt. Stercoris TAV is connected to the tractor with three point linkage system and it provide its movement with the PTO. Stercoris TAV fertilizer spreader with an import transmission transfers the motion from the PTO to the disc and performs the fertilizer spreading work by the centrifugal force on the discs. Stercoris TAV Fertilizer Spreader is also available with hydraulic control unit as an option. Hydraulic Control Unit allows you to open and close the pouring covers with the help of the hydraulic control.

| Model | Capacity | Disc Quantity | PTO Spin | Fertilizer Disk Spin | Working Width | Weight | Length | Width | Height |
|------------|----------|---------------|----------|----------------------|---------------|--------|--------|-------|--------|
| | Lt | pcs | rpm/min | bar | m | kg | cm | cm | cm |
| AG-TAV 400 | 400 | 1 | 540 | 685 | 18 | 120 | 103 | 114 | 111 |
| AG-TAV 500 | 500 | 1 | 540 | 685 | 18 | 135 | 106 | 140 | 121 |
| AG-TAV 600 | 600 | 1 | 540 | 685 | 18 | 140 | 112 | 148 | 120 |
| AG-TAV 800 | 800 | 1 | 540 | 685 | 18 | 170 | 111 | 165 | 128 |
